BIMSTEC-Japan Comprehensive Economic Cooperation: A step in the Future

The Bay of Bengal Initiative for Multi-sectoral Technical and Economic Cooperation (BIMSTEC) is the youngest regional cooperation initiatives in Asia. It is being increasingly seen as an important link between South and Southeast Asia. This publication contains paper presented by experts at an international conference, organized at the Thailand Development Research Institute (TDRI) in December 2006. It evaluates the current state of economic cooperation and integration between BIMSTEC and Japan, and also provides directions for the enhancing economic integration between them. The analysis in this book will contribute to a deeper understanding of the process of economic cooperation and integration in BIMSTEC and also in Asia.
